Subject: RE: oak ridge

Here is the footnote -

Radionuclide AWQC equivalents are based on **and** (??) EPA's *Office of Water Methodology for Deriving Ambient Water Quality Criteria for the Protection of Human Health (2000)*, EPA-822-B-00-004, pg. 5-1.

I think change is appropriate to the title. The FN 1 also gives us a little wiggle since only named radionuclides that DOE has identified but says it may not be inclusive. Charles could mention to Dimple that these would require another review possible minor revisions by HQ OLEM before shared outside EPA.

If you have the time and energy, here's a revised version of the first paper – only 2 pages long now, I made the longer table a separate document. I plan to send to Lorie by 4... thanks!

Charles – important revisions to accurately capture relationship of AWQC to the WQBEL. I'm glad to discuss these suggested revisions.

Thanks,

Thanks to you all for your help on this. Here's what I've got so far – please let me know if I've got anything wrong here, and keep in mind that Dimple asked for something fairly simple (a “one-pager”) about a complicated issue. Thanks!
